

Students for practical trainings, Diploma-thesis, PhD-Thesis

As support for our team in the field of fuel cells

We are currently seeking several students in almost all fields of fuel cell development, e. g.:

- methods development (e.g. electrophoretic deposition / ceramic injection moulding)
- thermal integration
- materials development (e.g. contacting materials development)
- simulation work
- system components development
- non-destructive testing methods in the production line
- production engineering to improve production line
- development of manufacturing-plants

Please send your application to Sabine Brausch: jobs@eZelleron.com
